## Analyzing the occlusion variation of single posterior ...

The digital occlusion analysis system cannot provide the vector sum of the occlusal force but can only provide the relative value of the numeric sum. The ROFs of implant prostheses at 2-week follow-up range from 2% to 18%. This wide range of initial data may be related to the nonstandardized occlusal adjustment process at implant prosthesis ...

## **Occlusal analysis and adjustment | Dental Economics**

Occlusion analysis is the study of the relationship of the occlusal surfaces of opposing teeth and their associated functional harmonies. The primary purpose of occlusion analysis is to reveal interferences in articulation which cannot be observed directly in the mouth.
